“ Rick I think about you often, Our first camping trip when you thought I was packing the house up and then laughed later because everything was needed. I remember you saying one day to me okay do you want to skydive or scuba dive, to say the least I did not jump out of a plane. Our trip to Canada with my parents, what an adventure, we had a blast. Skiing up at Mt. Hood.(Remember the snow storm we got stuck in.. Taking the boat out when ever possible and camping. Playing cards with our friends. Going out dancing or just staying home was fun. Then the 2nd phase of our relationship. You had a dream I got in an accident in my employer and insisted we get a new car, so we did. It was so important for you to see my parents, so you took me and my girls down to California. That was so thoughtful of you and a good trip. You were a good parent to my daughters and they loved you very much. I wish I could of done more for you to make you better. You were/are the love of my life and I will always remember your beautiful smile and kind heart and so much more...Love You Always Leslie
