SJ

“ I wanted to be there today to share this remembrance and tribute to Sig. As a fellow pilot who served along side him at Transwestern and Horizon, I wanted to say thank you for the Professionalism and dedication to knowledge and safety that he always possessed. As I sit here with this horrific cold, I felt I still wanted to make the trip. Then I thought of the advice that Sig would offer if I asked for his guidance: "Whadaya stupid?" Rest in peace friend.

“ I feel such sorrow that you are gone. It is all selfish of me. I miss you. All the talks over the fence, and the tomatoes for the dogs. The advise, the laughter, and grief. Riley the dog... I was in the doghouse for that. July 4th will I will think of you and laugh when Justine lights the biggest firework. I thought you were crazy with that torch!. I know you fought cancer with all you had. I know you were tired and hurt. I pray you are at peace watching over your family and friends as you always did. There is little less sparkle and laughter now. I am so glad you and Nancy were our neighbor and friends  
Fair winds Sig

“ There are no words to explain how our hearts are broken with the passing of Sig. He was so full of life and love that was cut way too short. We have so many great memories with Sig & Nancy that we will hold onto forever. He is in a better place now and is that bright star in the sky. See you again one day my friend.....
